

## Urban Designer / Landscape Architect

Scatliff + Miller + Murray is looking for an 'emerging' or established talent, or both. We have a portfolio of major projects underway that are capable of elevating a career. Core talents we are seeking involve the ability to express interesting design ideas with clarity and enthusiasm, both verbally and graphically (manually or digitally). We expect to hear from entry level candidates, emerging talent looking for a change, and from established practitioners.

We are vision-based and focused on sustainability, and that is what attracts our clients. From airports to commercial lands, from urban parks to new neighborhoods, from waterfronts to bridges, and from rezoning land to preparing a creative vision for future development, our team has excelled. Our team is trained in landscape architecture, planning, architecture, biological and earth sciences, engineering, graphic design, and construction management.

We are looking for a confident & capable experienced Urban Designer(s), with a body of work that demonstrates their design excellence (Landscape Architect, Architect, City Planner). The successful applicant is likely a dynamic personality with significant design talent looking to collaborate on challenging and exciting projects that better suit their career aspirations.

Inquiries are welcome. Any and all inquiries will be held in **strictest confidence**. Please submit a resume & portfolio (including both graphic and written communication examples) to:

Mike Scatliff, Director

[mike@scatliff.ca](mailto:mike@scatliff.ca)

We ask that all interested candidates submit by April 24<sup>th</sup>, 2017.

Thank you for your interest in our firm; only those selected for an interview will be contacted.
